

CHILDREN IN THE HEART OF OUR PLANET

Dimitrinka Petrova Todorova, Senior Teacher,
Kindergarden "Slance", Levski

"The land in the porthole is visible,
because the son is sad for his mother,
and we are sad for her, she is alone! "

Song from the Russian group "Funny guys"

Hello, Earthlings, welcome cosmonauts from different countries and nationalities! All of us, uploaded to our space ship Earth, cross the space and follow the steady path of time - from the past to the future. We travel all together with the galaxies and planets from outer space, all together, but each on our way.... Our ship is our mother Earth, the planet that created the precious Life in its bosom, preserved it, developed it, improved it through evolutionary changes to perfection.

Today, life on Earth is varied, its offspring - countless, every unique species and important and indispensable link in the chain of life. Her most wise creation - Man, still developing and perfecting, achieving incredible successes in science, technology, technology, makes spectacular discoveries going forward and upward - to the future, to the universe...

His journey was not short and easy, but the man, with much effort, will, perseverance, and reason, follows him unceasingly today. He not only thinks wisely, he works, he dreams, he has feelings - pure, selfless, beautiful and deep. His dreams and feelings, the man expresses himself with the arts that bring him aesthetic pleasure and satisfaction and educate the next generations in a spirit of kindness, tolerance and commitment to everything that brings the spark of life in himself.

Many are the achievements of man, many are his riches and values, but his greatest wealth is his children and the love for them - the purest and most sincere human feeling.

Its motivation for progress is their future - here on Earth, or somewhere beyond, in space? Children are the future, so fragile, wounded and gentle today, in need of care, love, love and wisdom, from guidance and knowledge and ... of freedom! To spread their wings for flight like birds of prey! To pursue and achieve your wildest dreams! To make the world a better place, make new

discoveries, create new, life-saving drugs, fly into space and discover another, albeit different, Life!

Let's give them this great opportunity to live worthy, discover and create in the name of the future, in the name of the coming generations, in the name of their children and the future of the planet.

Earth as a real mother swings them in the cradle of life and protects and protects them, carries them deep into their hearts, grants them with amazing nature, endless possibilities for their exploration and preservation....

Does the future manifest? How does he see them? What will they do? Where will they go?

She is wise and confident in their abilities - she has perfected them for millions of years!

She knows they will one day leave her. But, you say, not right now, not yet, not so soon ... Let them grow up, get more and more wise, understand that mother, home, family, Motherland and the world of earthlings are the most expensive that is worn in the heart everywhere. They have to be protected and protected, to LOVE!

Yes, that is, the Earth carries them and keeps them in their hearts, crosses time and space and swings them in the cradle of life, prepares them for discoveries and adventures, for exploring and conquering the universe....

But is it ready to part with them?

They say that if you love someone very much, you must allow him, when the time comes, to go away to live freely and happily...

You, Earth, are you ready to allow your children to leave you to discover new worlds?

I know that like any mother and you want to keep them with you longer...

I know! And I'm a mother too...

But the childhood is over, the children leave their native home to stay in their mother's heart forever...

Let them go, Earth! Let them out of the nest! Let's get to know the universe!
